

HH Club League, Season 5 - Final Results (After 18 Events)

I have chosen the best 8 results from a season of 18 events - and show points from best 8, numbers of events entered and total points from all entries.

The calculation depends upon your handicap which is determined by past performance, including a weighted legacy from previous seasons. Newcomers in the season are assumed to run at their handicap speed for their first two events. It depends next upon a synthetic minutes per km figure (which includes course climb). [For some events climb data is lacking or suspect - but all runners are affected similarly]. As your performance departs from handicap, the points results are more arguable. Running at half your handicap speed will generate zero points: running at twice your handicap speed will generate 150 points. Running at handicap generates 100 points. Despite the decimal points, differences of less than 5 in a season are probably not significant. The exercise is supposed to be FUN - and can best show whether you are improving or declining over a season. A brilliant result will result in an adjusted handicap for next year!

HH Club League Season 5 (autumn 2007 to summer 2008) points after all 18 events. Best 8 scores from the 18 events in the season to score. Non-scoring events are shown with a grey background.

If you have any queries about the league please contact Christopher Drew, club.league@happyherts.org.uk
