

HH Club League, Season 7 - Positions after 16/16 Events

The calculation depends upon your handicap which is determined by past performance, including a weighted legacy from previous seasons. Newcomers in the season are assumed to run at their handicap speed for their first two events. It depends next upon a synthetic minutes per km figure (which includes course climb). As your performance departs from handicap, the points results are more arguable. Running at half your handicap speed will generate zero points: running at twice your handicap speed will generate 150 points. Running at handicap generates 100 points. Despite the decimal points, differences of less than 5 in a season are probably not significant. The exercise is supposed to be FUN - and can best show whether you are improving or declining over a season. HH Club League Season 7 (autumn 2009 to summer 2010) points after 16 events. Best 6 scores from the events in the season to score. Non-scoring events are shown with a grey background. Events establishing your handicap are shown with a light green background.

If you have any queries about the league or wish to be removed from the list please contact Mike Bennett, [club.league \[at\] happyherts.org.uk](mailto:club.league[at]happyherts.org.uk)
